

By VINCENT THOMAS
Assemblyman, 68th District
 The 1963 Regular Session of the Legislature is closer than many of us think. Studies now being started by Senate fact finding and Assembly interim committees will have considerable influence on the shape of proposed legislation which will be brought before us 18 months from now.

Several of the 26 Assembly interim groups have already held initial meetings, and others are scheduled during the balance of August. A joint committee has had an interesting subcommittee meeting, which should be productive of further economy in government costs, as I will explain hereafter.

committee, at its first three-day hearing, began its investigation of two of the topics assigned to it. First, it took up the possibility and advisability of providing aviation education in high schools and junior colleges. Second, it toured small districts in Del Norte and Humboldt counties, to secure first-hand information about the problems such district en-

Organizational meetings have been held by both the Assembly transportation and commerce, and the livestock and dairies committees to lay out their plans of work during the coming months. Their plans, like those of all other groups, must, of course, be tailored to

the funds allotted for their operations, in order to get the greatest results from the money used. The rules committee, which guards the purse strings for the Assembly, has also held a procedural meeting.

pital site was inspected by committee members as a preliminary step in its investigation.

The subcommittee on printing of the joint committee on legislative organization held an important meeting on the use and costs of duplicating equipment used by various agencies of state government. Use of such equipment is ordinarily authorized in agency budgets so they can duplicate small numbers of documents — 50 or 100 copies

needs. The group was told, however, that duplication had grown until it is no longer "small business." Original cost of such equipment in various agencies now totals more than \$400,000. Annually salaries of operators exceeds \$700,000 and supplies and maintenance \$270,000.

THE SUBCOMMITTEE was reminded that, in addition to maintaining the largest printing plant in the West, the department of finance also has a

will duplicate material by any other process than printing, at cost for any state agency needing the service.

The Assembly interim committee on water has announced a tentative schedule of meetings running into November, to cover the subjects assigned to it. Restoration and improvement of groundwater reserves, expenditure controls under the state water bond act, facility relocation costs, and conversion of salt to usable water are some of the

Programs for Senate fact-finding committees are in preparation, and should be available shortly. Like the Assembly groups, they, too, will be busily at work during the months to come.

Ryan Employees Plan Annual Plant Picnic

Employees of the Torrance plant of Ryan Aircraft, Inc. will hold their annual picnic Sunday, Aug. 27, at Peck Park in San Pedro from 9 a.m. to 4 p.m. More than 1000 employees and employee families are expected to attend.

Entertainment and prizes galore will highlight the annual event. Pony rides, rocket rides and a chair swing along with soft drinks, ice cream and pop corn will be free to those attending. Entertainment will include a clown and a marionette show. Magic acts are planned also.

ANOTHER feature of the event will be the softball game to be played between the Torrance team and the powerful San Diego nine. The contest will decide the inter-plant title.

Novelty contest for both children and adults, horseshoes, volleyball, tennis and bingo games will also provide plenty of fun.

• • •
AMONG THE many prizes to be awarded are a portable television set, and a prize to the person who shakes the hands of a "mystery couple" at a certain time during the day.

Doug Rigby, personnel supervisor, is picnic committee coordinator. He is assisted by Bruce Lee, Anna Robinson, Jessie Berry, Sal Molinari, Jr., and Jim McDonald.

Evaporated milk has the same nutritional value as whole milk, including proteins, carbohydrates, calcium and phosphorus, with extra vitamin D as a bonus.
